A
calibration setting (independent seeds)
$\alpha_{inter} = 0.1$
$\alpha_{inter} = 0.3$
$\alpha_{inter} = 0.6$
$\sigma_{env} = 0.1$
$\sigma_{env} = 0.2$
outside small-noise regime
Simulated shared/independent CV^2_{tot} ratio
Ratio predicted before simulation
B
Shared/independent CV^2_{tot} ratio
floor-free reversal (95% interval above one)
Environmental innovation SD, σ_{env}
$\log_{10}$ small-noise coefficient
